

Challenge: Requirement to modify t-code: zmm22182 for business use

Changes asked:

1. Making the fields MBLNRN(material document),BUDAT(Posting date),BKTXT(text) editable in the output ALV irrespective of the filter criteria in the selection screen of t-code :zmm22182
2. Adding MBLNRN and MBLNR fields to output ALV display.
3. Auto update of the data in the internal custom table of the client whenever any action wrt fields is done.
4. Error trigger when material document is keyed in as 9999999999 and text is empty.
5. Making the quantity field as non editable in output ALV display.
6. Updation of TS documents as per KAO (client) requirement.
